Furever Home

1. Project Description

Furever Home is a responsive multi-page website designed to promote pet adoption and connect potential pet owners with animals in need. The project raises awareness about animal welfare and showcases available pets, success stories, and contact information for the shelter.

2. Topic Chosen

Pet Adoption Website — helping users find and adopt animals while learning more about the shelter's mission and impact.

3. Features Implemented

- **Multi-page structure** (Home, About Us, Pets, Success Stories, Contact)
- **Responsive design** using **Bootstrap 5** and **custom CSS Grid/Flexbox**
- **Navigation bar** with collapsible mobile menu
- **Lazy loading for below-the-fold images** (loading="lazy") to improve page performance
- **Interactive buttons** with hover effects
- **Pet adoption statistics table**
- **Contact form** and location map
- **Consistent design and branding** across all pages
- **Custom footer and header components**

4. Technologies Used

- HTML
- CSS
- Bootstrap 5

5. Performance Optimization

Implemented loading="lazy" on all images that appear **below the fold** (on Pets, Stories, and Contact pages).

This helps reduce initial loading time and improve overall website performance.
